

SKILL SPARK

Learning Management System for Financial Services Training

Step out of the shadow of lurching legacy systems with a robust and reliable LMS for financial services.

- ✓ Delivering up-to-date banking compliance training in an ever-changing legislative landscape
- ✓ Launching your LMS for financial services is as easy as entering your email address and logging in
- ✓ Drag and drop your courses to go live in a matter of minutes

Control Compliance

Stay safe in the knowledge you're on the right side of the regulator. Whenever new legislation crops up, edit courses in a snap to keep your learners up to date with the LMS for financial services.

Document your Training

Sail through audits and meetings with the in-depth reporting engine. Monitor everything from banking compliance training down to portal activity.

Cut down on employee turnover

Prove your commitment to building your team's careers and build loyalty in return. Choose from a wealth of question types to identify skill levels, then assign courses to bridge the gap and invest in your people.

Organize your training

Front office, middle office, back office - you've got teams to train in different places. Relieve the headache with a hassle-free platform. Divide learners into different branches, plot course paths, and deliver targeted learning without the snags of traditional training.

Customizable Branding:

Tailor the LMS to reflect your company's identity with options for customizing completion certificates, email notifications, platform colors, and even the domain name, enhancing the training experience for your employees

AI-Powered Content Creation Tool

Stay ahead of technological advancements with our AI creation tool. Quickly develop engaging training content on the latest technologies, compliance protocols, and customer service strategies, ensuring your team is always equipped with up-to-date knowledge.
